Credly

Objective

Aspiring AI/ML engineer pursuing M.Sc. in Data Science, with experience developing machine learning, computer vision, and GenAI applications. Seeking an opportunity to contribute to real-world AI solutions by combining data science, software engineering, and problem-solving skills.

Education

Coimbatore Institute of Technology 2024 – 2029
MSc Data Science 81%

PKD Matric Higher secondary School, Pollachi 2024
Higher secondary 85%

Technical Skills

- Python
- HTML , CSS and JS
- MySQL

Projects

KCI - Kandhari Construction Intelligence
Developed a computer vision inspection platform performing real-time multi-class defect segmentation on bridge infrastructure, incorporating a deterministic AASHTO risk assessment engine, grounded LLM narrative synthesis, automated PDF report generation

Techstack: Python, PyTorch, FPN, OpenCV, FastAPI, React, Vite, Google Gemini API, PyMuPDF

GUIDO - Genomic Unified Intelligence for Disease Oncology
Developed a biomedical AI platform to predict cancer risk using XGBoost-based clinical models integrated with SHAP explainability, LLM-driven evidence validation, and structured confidence scoring for transparent model auditing.

Techstack: Python, FastAPI, React, Vite, Docker, XGBoost, SHAP, Groq API

Gen-AI Testing for Developers
Designed a configurable AI-driven testing assistant capable of analyzing local project directories, evaluating code structure, and generating structured feedback to improve software quality and development efficiency.

Techstack: Python, LLM APIs, File System Access, JSON-based Evaluation Engine

Core Competencies

- Leadership
- Teamwork & Collaboration
- Event Coordination
- Critical Thinking

Courses

The Complete Data Structures And Algorithm in python
Udemy

Mathematical Foundation of Machine Learning
IISc (NPTEL)
